

Empiric report from the bio cheese factory

When I experienced over the Origin OF Life energy symbols and their effect on a lecture, I was at first very sceptical and critical. Since I was curious in addition, I wanted to test it with fuel oil consumption.

We have 4 tanks A of 2500 litres fuel oil with consumption gauge in the cheese factory. The conditions are read off each month and compared with actual milk consumption. Fuel oil consumption divided by milk quantity results in an accurate result.

Starting situation: Oil tank without Origin of Energy system:
Here the oil consumption per kg of milk was with 27,5 g oil.

Change by Origin of Energy system:
Here the oil consumption lay then per kg of milk with 23,5g oil,
this corresponds to 4 g less opposite before,

that means a saving of 14,54%

Since February 2005 we work with Origin OF Energy and the result remained since then constant. Tendency was rather still more saving. Supposed also the improved energised water in the heating system is with-responsible for an additional saving.

We have a further experience made with the water, by the water band at that Main water pipeline. The lime is no longer so hard, rather powder-like in the pot and can much more easily be cleaned. With the plate-type heat exchanger, these are used for the water of the heating, stated we that as well as no more lime deposits form, and this after already 9 months. Before we had to decalcify at the latest every 6 months the plates even with hydrochloric acid. In addition is our cleaning solution 2-3 times longer usably, so that we have also here less consumption of cleaning agents.

The managing director of the bio looking cheese factory
Peter Romer

Editorial

On the occasion of 7 - year old existence of the Origin of Life energy - products, the publishing house would like to present you some interesting empiric reports. This in the impact remarkable products, meanwhile ever more have won at reliability and acceptance. Supporting here were surely also the water studies of the Hagalis institute at the Bodensee, as well as its new book of "devices published for water stimulation" and naturally also the many empiric reports of humans from the most different occupations and areas of application. We only can encourage each humans to concern itself with these highly interesting topics - finally are we here, in order to collect realizations and experiences. This is the only one, which we can carry forward.

The editorship

Excerpts from Origin of Life empiric reports

In my practice for psychotherapy I have made interesting and very positive experiences with the Origin OF Life products. The consulting rooms are among other things equipped with large pictures of the motives "Christian universe" and "father symbol", energy spirals and Cushion. Patients place surprised firmly again and again, if you enter my consulting rooms, what good atmosphere and energy here prevails; they address me often directly on it.

With my seminars it is to be observed again and again that the seats are directly with the energy pictures occupied as first in the seminar area. Although we work intensively and arduously in the seminars, the so-called "in the afternoon tiredness" is missing after the meal, since the seminar participants drink water, which is located, in jugs on the Table sets or multi-sets and if necessarily briefly under the chair put the energy spiral, or the feet drauf to briefly place.

What enormous power and action the energy spirals have, showed me clearly up that in the comparison with even intensive, emotional deep meetings (e.g. trauma) the patients in my practice in an energetically good condition to remain here and refuel new power, however with therapy meetings on my vocational jour-

neys the patients are often clearly exhausted. As this had become consciously to me, I let put thereupon a bring-along energy spiral of a female patient under the chair, when she was obviously exhausted due to the emotional profound meeting and also expressed this; she said immediately surprised: "Within 20 sec. I felt a clear energy thrust and my exhaustion was away". She felt not only emotional released, but also immediately again force and energetic.

I advise also again and again **to hang the large pictures up in offices, because they contribute** also there substantially to the harmonization and energising the room climate, which the positive feedbacks confirm again and again.

Empiric report from a medical practice

I am a physician who learned about Origin of Life products three years ago at an exhibition called "You and Your World." I previously suffered from stress induced insomnia and disturbed sleep patterns. I was interesting in trying the Origin of Life products to see if they could assist, so I purchased the Multi-Table Set and placed them under my bed to see if my sleep patterns would improve. I also purchased the Large Energy picture for my home and office, as I believed that the stress was induced by negative geopathic and magnetic forces.

I placed the Multi-Table Set under the head of my bed, and one of the Large Energy pictures on the wall behind the head of the bed. The first night I experienced so much restlessness that the next morning I could only give a negative report to the representative at the exhibition. He advised me that due to the very high energy of the picture I should allow myself to become gradually accustomed to it and so I did this and now that I have become accustomed to the energy I have 6 hours of uninterrupted sleep and wake up in the morning feeling refreshed and vibrant.

I also feel that the geopathic stress energy in the house has changed: before we had the products our dog would only sleep in a couple of places in the house and now he can sleep anywhere. My whole family uses the OOL products in various ways and we have noticed the following improvements: general feeling of well-being when the First Aid Card is worn around the neck on the thymus gland; pain, swelling or bruising of the fingers did not occur after injury was treated by placing the fingers on the Card; we also found that toothache could be successfully treated with the Card. All our mobile phones now have

the Mobile Phone Care symbol in them. In my practice I carry out routine and emergency surgical operations and use the Multi Table Sets under the mattresses of the patients in the recovery room. On awakening all my patients feel good and have very few complaints of pain or immobility.

Scarcely 3 months ago I began to use the Energy Spiral for treatments; I had a patient who had been diagnosed with un-treatable warts on his foot but after only 2 sessions of treating his foot with the Energy Spiral there was a noticeable improvement in the appearance of the warts and following the third session the warts had reduced in size considerably. In total I conducted 5 sessions and by the end of the treatment the warts had completely disappeared and left no trace of having been there in the first place.

I also used the Energy Spiral with a patient who had shoulder and back pain. Not only did he feel an immediate improvement but I could also immediately feel heat in the treated area due to increased blood circulation.

A patient with an anal sore reported feeling intense heat when sitting on a Spiral - the sore then bled strongly and again the next day and then it was healed.

A married couple tried out the Energy Points where they were experiencing back and shoulder pain. Within a short time they experienced much relief from the pain and could begin to move freely once more. **Interestingly these** Energy Points remained on the skin for up to 2 weeks.

Even though I was initially skeptical about the claims made for the OOL products, I am now convinced of their effectiveness and value even without conclusive medical or scientific proof. Meanwhile there are numerous alternative test procedures that could be applied to determine the effectiveness of OOL products, e.g. Prognos procedure, EAV (Elektroakupunktur after Dr. Voll), Kirleanfotografie.

Experience with water energy the filter system

We had large problems with persistent lime (before all at the showering walls and at the taps one already saw ugly white lime marks after unique showering). Recently our washing machine did not function any longer. A called customer service stated that the filter the water was inlet completely close (lime, sand). I already noticed the effect of your filter with first showers: The water is very soft and very pleasant on the skin. At the showering wall remain only minimum whitish marks, which can be wiped off however simply. Their advisor said that this was normal, this to us is at that time minerals, which should not naturally be filtered from the water.

A school reports

I work as Primar teacher in Serneus and was allowed to experience a mad surprise. At the beginning of the school year I have two distortion zones, which neutralizes the noticeably existing electrical radiation under the building run as well as at the fuse box in our school building with the Multi Table set.

The energy value in the class room improved thereby substantially. I additionally stuck a boy a Multi Table set under its table surface. He had naturally discovered it after some time and had asked me, to which this sticks there. I explained to him that perhaps this symbol helps him to be able to work faster and better. He agreed with it. After approximately two weeks I removed the table set again (without his knowledge), and it took still some days up to that Autumn holidays. Already in the first week after renewed beginning of school this boy asked me whether he could not have the mat again, because he can concentrate thereby much better and work faster. I was pleased enormous over this spontaneous report and felt confirmed in the fact that children very intuitively react on existing - or evenly on not existing - energies.

Nano Zoja from Serneus in Switzerland

Note of the publishing house:

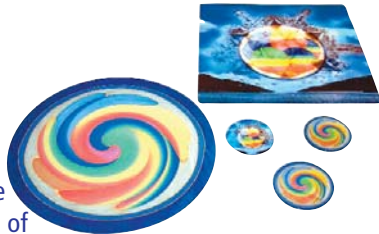

Also the Essences worked with children outstanding with lack of concentration.

Empiric reports with Free Energy Tuning - passenger car

I drive 80,000 - 100,000 km per year with my Volvo XC 90 and have with odometer reading 30.000 the Free Energy Tuning set (PKW2) of Origin of Life acquired and inserted. Since I inserted it, **I need approx. 1.5 - 2 litre per 100 km less fuel** and there are audible fewer engine noises! Pleasing it is also that the Volvo up to 15 km/h faster drives now. I am thereby much content and can it only further-recommend.

Love of greetings Dietmar from Lichtenstein
info@panoag.com

Since the installation of the Origin of Life passenger car system I drive 100 km per tank more, this corresponds to 7 litres of saving per tank filling.

Energy workers report Portable radio mast - alarm!!

We got new portable radio masts in the proximity of our house set up. I am very sensitive, which concerns portable radio jets and electrical smog.

At the 1. Day, when the mobile phone mast was taken in enterprise, I could not sleep at night and on the next morning could I any longer rise - I could not move absolutely any longer. We work with one "Vegatestgerät" - with this we could measure only completely low energy values then in my Organs. **To the neutralization of our sleep place because of water veins we had already put earth jets before longer time multi-set of Origin of Life under our beds, on which we could sleep very well.** But these were not apparent sufficient for the new portable radio jets, which were added now. My man got a large energy picture from the living room motive Christ-All universe and held it only to the window, behind which some meters the far portable radio mast stood. I felt suddenly better, felt my energy Return again and could rise. A renewed measurement of the energy values of my organs resulted in a substantial increase of the values of all organs.

Since that time we equipped, sleep our bedroom likewise with this energetic art print outstanding and feel high-energy.

Experiences from the animal world

Cats: We put with our 4 newborn cats babies a Multi Table set under the cat basket. They continued to develop unusually fast, e.g. they have already after 7 days the eyes opened - normally that took always around 14 days.

One of them verse-dipped itself with the jump the behind paw and limped strongly. It put itself automatically on this day and on the multi the Table set on our couch. Afterwards everything was O.K. again. Another young cat puppy ran later into a car, survived - however a shifted back part had, couldn't run thereafter any longer, only could crawl. **On the same day we put it on a Multi Table set. In the evening it crawled still, but on the next morning it could run again completely normally.** Limping was only hardly to be recognised.

From a nature welfare practice in Austria

Handy Care: Many Clienten report that with the new Handy Care telephoning is no longer so fatiguing. No hot ears more.

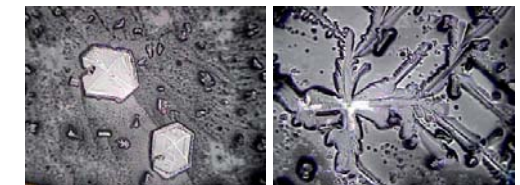

Energy Points: With pain or injuries 6 pieces in the circle and 1 pieces in the center attach; this causes according to many feedbacks of Patient the best results.

Essences: When dissolving poisonings I use the Essences with very large success for the support. The clients report that they grew much more in the center and loads better. Also with continuous ear pain and ear tones the Essenz was helpful in the use.

Portable radio jets change water structures - our body consists of 70% water

Excerpt water analysis: Irradiation water with mobile phone. In the comparison test it shows up that the method points clear effects to the neutralization of the portable radio radiation of the company Origin of Life. In the picture left hexagonal show up Forms with a 60° angle structure. This meant that also the bio-availability of the minerals clearly rose, so with the sample with the untreated mobile phone did not arise. That is called right in the picture is 90° angles to be seen, which refer to a pollution impact.

with Handy-Care

without Handy-Care

Experience from a private household

For nearly one year I use a Origin of Life water on table filter. It is very good to know to have good, clean, clear, water high-energy, also spring water quality directly from my water pipeline that this now freely of rough material pollutants and Pollutant information is. Water bottles or water boxes do not drag are necessary any longer, because the filtered water from my water pipeline tastes outstanding. The water feels more softly, it tastes also softer, and I have the feeling that the thirst becomes lively.

Also the Tea or coffee, which is prepared with this water, has a intensivieres flavour and tastes much better.

The same applies to fruit juices, which are mixed with this water. Likewise that water digester had to be decalcified before after a quite short period.

Since I use filtered water, my water digester remains almost lime-free. Few the lime, which sets off, is of soft consistency, how pulverizes, like completely fine sugar, so that it can be wiped off simply. My three cats get this water to also only drink, and I notice that they became drinkmore joyful. Also my flowers and plants profit from the water, by prospering magnificently and thus have a longer life span. I am again and again astonished and enthusiastically, what an impact without exception all Origin of Life of energy products cause.

Companies Report

We have the PC protect system since approx. 2 months at two computers in ours Enterprise assigned. I work partly daily more than 10 hours on the computer and suffered in the past more frequently from chord sheath inflammation or tennis arm/mouse arm in the right Wrist up up to the shoulder. Since we attached the PC protect system, I do not have complaints this concerning more. **Particularly the right wrist became completely pain-free. To mark it remains still that the Mousepad contributes by its extremely smooth surface already alone mechanically to relaxed work.** The symbols settle the remainder. The Handy Care now is for over 2 months in my mobile phone. Both I and my customers can on the fact report that Indisposition and passes in the head during telephoning disappeared now. I thank you for your protruding Products.

Experiences from the practice of a Rutengänger

When I met before 2 years with the symbol of Origin of life®, my skepticism was as scientifically working Rutengänger very largely. My past measuring and screens were e.g. based on scientifically provable reductions of interference factors like electrical smog.

However I could extend horizon with the becoming acquainted with of the Kinesiology mine and am since then also with the products more than convinced of Origin of Life®. I had a personal drastic experience with the past treatment of my complaints in the left knee. Due to a tear in the meniscus I had a dancing pain so far after some rounds up to strong swelling in the mentioned knee. This became with bandages and inflammation treating creams after 1-2 days again bearable. **Since then I the energy spiral daily 3-4 times in each case a 1/4h presented and in each case 3-7 points of energy at the knee attached and so the knee during one period of approx. 2 months treated, the complaints had disappeared.** A threatening operation of the left knee could be turned away - which made me particularly lucky. I have experienced by those Symbols of Origin of Life® a stabilization of my self healing forces and thank you for the received gift many times.

With my testing the sleep areas of Clients are often to disturbances such as electrical smog from the electrical wiring in the bedroom, permanent faults by cord lot telephone system (DECT technology), as well as irradiation by mobile phone radio masts. Apart from the possibility, to turn off the radiation in the house, or

with that Table set from Origin of Life® to harmonize, prepares the irradiation by transmitting poles repeatedly additional requirements. Here the different energy pictures of Origin of Life® are used. These harmonize and screen this irradiation for the full satisfaction of the concerning. Since introduction of the water system (activated charcoal filter with Origin of Life® Energising) I drink only the prepared tap water and am totally inspired over taste and "Süffigkeit". Annoying box drag is void. Not only I, but also my flowers do enjoy best vitality. With the flood 2005 our tap water had to be shifted temporarily with chlorine. I could not determine

this when drinking, since the activated charcoal filter carries here best services out - however at showering was not the taste "over-smells"!

Under the many positive resonances out uses of Origin of Life® products mean want I a special case to still present: **An older lady got 7 points of energy from me for testing. She had trouble for 4 weeks with extreme Ischias hurts around. Orthopedic applications as well as pain syringes could not improve the pain and that already for 4 weeks.**

From your narrations I experienced that you because of "all Hokus Pokus" only into the waste threw the points. Since however the pain and the nocturnal peace did not become better, she took the points out full despair and puted them around the hurting places. The result was the fact that you on the next day around 7:30 clock called me and full enthusiasm of first through sleeps for 4 weeks and had to report to clear improvement of the pain.

Experience from a private household

We live in a single-family house constructed in 1973, with an original overall surface area of 135 square metres. We had a Free Energy Tuning system from Origin of Life installed to improve the oil heating system.

The attic, which is approximately thirty square metres and previously uninhabited, was developed into an apartment. It usually does not cool down much during the winter months, but we hoped that with the remodel it would be more energy efficient. Since the attic was remodelled and was going to be used as a rental flat,

it would add to our overall oil consumption. Prior to the remodel of the attic, the consumption had been 3000 litres per year, and this included the energy used for hot water. We calculated the new consumption based on 165 sq.metres divided by the previous annual consumption and derived a usage of 18.2 litres per sq. metre. However, this was not including the increased hot water consumption that would occur. We installed the Free Energy System and tuned it for the space, and then allowed a three month timeframe to observe the results.

After the time period allowed, during which the attic flat was occupied by a family of five, our overall calculated annual consumption was to be 3500 litres per year, or 15.2 litres per sq. metre.

If we had not installed the Free Energy Tuning system, our usage would have been 690 litres higher. Therefore, we calculated a savings of 16.5% overall with the Energy Tuning System. Our environmental impact was also much lower due to the system.

We would recommend this system to anyone interested in saving energy costs and saving the environment at the same time. It will also increase the value of your home and property.

Sincerely,

Kurt Mueller

Empiric reports with Free Energy Tuning - passenger car

I purchased an Origin of Life Car Tuning set, and have been very surprise with the results on my fuel mileage performance. I spend a lot of time travelling for my business, and reducing fuel costs is important to me. When I heard about this kit, I installed it right away. Before I installed it I could get about 620 km from one tank of petrol, but now with Origin of Life Car Tuning system I get 60-100 km more from one tank of petrol

Empiric reports with Free Energy Tuning - passenger car

I drive a Subaru Impreza and my petrol consumption was per 100 kilometres before installing the Origin of Life Car Tuning system. My consumption per 100 km after the installation is approximately 2-3 litres less. Overall, I am saving 10-12 litres of fuel per filling. Also, my engine is now running quieter. I am very content with the Tuning system, and heartily recommend it to anyone. My overall average consumption is now 7.81 litres per 100km. (Please refer to compiled statistics below. No statistics are available for the time period of June 2005, May 2006, December 2006 and June 2007)

Date	Litres per 100km

Empiric reports with Water-Energy-System

My experiences with WES ENERGY the system are simply said sensational! Naturally I and my friend wanted as fast as possible also a result and gave to the product a chance. We tried it first the old water storage water heater out, because that was according to our opinion the most difficult place. **We were astonished, as the water storage water heaters for the second time filled noticed we amazing soft water quality.**

Next we noticed that the lime could be removed everywhere in the bathroom from day to day more easily and after approx.. 2 weeks the lime had disappeared as. Wash basins, bath tub, taps, tiles are all together lime-free! and at the same time the lime in our water digester dissolved completely.

Above all now the Lime-removers is omitted, which actually only cost. We humans are always critical with new things, but we should see also once that one must give first the chance to a product, before one can deliver at all a statement over it. The own experience is convinced it, the one. Try it and you will be inspired!
